 Abhishek Kachare

 Abhishek's Portfolio

SUMMARY

I am a second-year Computer Engineering student focused on Math, Python, and data analysis. My portfolio includes EDA, clinical data wrangling, and API integrations. I also have a deep interest in cybersecurity and computer architecture, recently developing digital forensic tool concepts. I blend analytical thinking with hands-on software development to solve modern challenges and am eager to apply my skills to a technical internship.

LANGUAGES

English		Marathi

EDUCATION

08/2024 – Present Pune	Bachelors of Engineering in Computer Engineering Government College of Engineering and Research , Pune • Relevant Coursework: Data Structures, Applied Science, Discrete Mathematics, Relational Databases. • Core Competencies: Proficient in data manipulation, exploratory data analysis (EDA), and applying statistical tests using Python (NumPy, Pandas, SciPy). • Experience: Being a sophomore in the college I have participated in various skill building activities and also been in the organizing committee of various events.
07/2022 – 04/2024 Navi Mumbai	High School Lokmanya Tilak International School • Academics: 12th Boards: 89.8% MHT-CET: 95.96 Percentile JEE Mains: 92.88 Percentile . • Extracurriculars & Sports: Represented the school in Football, Basketball and actively participated in debates, science fairs, makeathon, balancing rigorous academic preparation with team-based activities.

TECHNICAL SKILLS

Programming and Scripting

Python (Data Analysis), **C/C++** (Logic & Algorithms), and **SQL/MongoDB** (Database Management).

Development

Managing code versions with **Git/GitHub** and developing logic-driven scripts in VS Code.

Data Science & Libraries

Pandas, NumPy, SciPy, Exploratory Data Analysis (EDA), Statistical Analysis, Principal Component Analysis (PCA)

Visuals

Using **Canva** to design technical presentations and project UI concepts

SOFT SKILLS

Technical Communication

Explaining intricate engineering and data concepts clearly to both technical teams and general audiences.

Adaptability & Rapid Learning

Quickly picking up new programming frameworks or technical domains and applying them to real-world challenges.

Project Documentation

Creating clear and professional presentation materials to explain the goals and findings of technical research.

Team Collaboration

Working effectively in diverse group settings to meet deadlines during intensive projects and competitions

PROJECTS

Clinical Trial Data Wrangler

Developed a Python-based data pipeline to integrate disparate pharmaceutical datasets, including patient demographics, lab results, and dosage logs.

- Utilized **Pandas** to perform data cleaning, handle missing values, and ensure data integrity across multi-source records.
- Streamlined the merging process to create unified datasets ready for downstream statistical analysis and clinical research.

Global Happiness Index Analysis

- Performed comprehensive **Exploratory Data Analysis (EDA)** on the World Happiness Report dataset using **Python** to identify key drivers of global well-being.
- Conducted **Spearman correlation** analysis to determine the relationship between socioeconomic factors—such as GDP per capita and social support—and happiness rankings.
- Utilized **Pandas** for data cleaning and **Matplotlib/Seaborn** to generate correlation heatmaps and visualizations that highlight regional trends.
